EDUCATION

University of Pune (SPPU)

B.E. IN ARTIFICIAL INTELLIGENCE & MACHINE LEARNING

Pune, India | 2022 – Jun 2026

WORK EXPERIENCE

AURA | FOUNDER

Pune, India | Jun 2025 – Present

- Built a wearable AI system end to end: ESP32-S3 firmware (FreeRTOS I2S DMA audio at 16 kHz, Opus compression, OTA updates), FastAPI backend with MCP server and memory routers, self-hosted Deepgram Nova-3 ASR on Kubernetes Helm charts.
- Contribute to the 13.5k-star Omi open-source ecosystem: 21 issue reports with root causes, 5 adopted downstream (speaker clustering fix with 52 unit tests, WebGL leak diagnosis, action-item grounding), 3 of 7 authored PRs maintainer-approved.
- Write architectural RFCs and decision records covering voice pipelines, memory systems, and harness design tradeoffs.

FREELANCER | AI & AUTOMATION

Remote | Sep 2024 – Present

- Built custom AI agent workflows and automation scripts for student and developer projects, with multi-provider LLM fallback and token cost tracking per feature.

AICTE VIA GOOGLE | AI & ML INTERN

Remote, India | Oct 2024 – Dec 2024

- Built and evaluated on-device vision models with TensorFlow and Google ML Kit, trading inference latency against accuracy under mobile memory limits.

PROJECTS

MIA | PERSONAL AI ENGINEERING OS →

TYPESCRIPT, BUN, VITEST, JSONL

- Compiled TypeScript CLI running a 5-stage engineering harness (grill, spec, plan, review, ship) with unified adapters for Claude, OpenAI, and local models, plus automated verification gates (lint, typecheck, Vitest).
- Immutable JSONL state tracking for auditability; daemon-removal decision recorded in ADR-0001.

LLM-COUNCIL | MULTI-MODEL CONSENSUS ENGINE →

PYTHON, FASTAPI, REACT, VITE

- Cross-evaluates answers from OpenAI, Anthropic, Gemini, and Groq through an Analyst, Skeptic, Synthesizer pipeline; React frontend visualizes step-by-step model agreement.

JOHN | ANDROID VOICE CLIENT →

KOTLIN, JETPACK COMPOSE, PYTHON, LIVEKIT

- Native Android app connected to a Python LiveKit voice agent via WebRTC, with client-side Silero VAD for instant barge-in and tool calling for calendar, tasks, and telephony.

SKILLS

Languages: Python, TypeScript/JavaScript, Kotlin, C/C++

AI & Agents: LLM tool calling (MCP), RAG, multi-agent orchestration, TensorFlow, PyTorch, ML Kit

Engineering: React, Node.js, FastAPI, REST APIs, Git/GitHub, Vitest, Supabase/pgvector, Kubernetes Helm
